

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Response:

The institute along with traditional lecture method uses various student centric pedagogical techniques for an effective teaching learning experience and improved learning outcomes for students.

	Various Techniques Used
Experiential Learning Techniques	1.Group Assignments and Project: Students from some programmes are assigned group projects, to enhance their various technical and soft skills in which they are encouraged to apply concepts learned in classroom
	2.Field Visits/Industrial Visits : Undertaken to understand the working of plants and organizations.
Participative Learning Techniques	1.Group Discussions and Debates : To inculcate participative learning and improve communication skills ,idea generation and presentation skills.

	<p>2.Through Movie Screening, Newspaper reading & Book reviews : To enhance critical thinking of students,inculcate habit reviewing analysis and the responsibility of reaching a conclusion.</p>
Problem- Solving Techniques	<p>1. Study of Current Affairs: Used to increase student’s participation in problem solving and develop the skills of academic reading and spending daily hours in the Library.</p>
	<p>2. Quiz: Used to develop logical reasoning and problem solving skills.</p>
	<p>3. Assignments,Presentations: Used to develop academic skills and chance to face audience and answer their queries.</p>
	<p>4.Tutorials: Problem Solving daily sessions by teachers with their students.</p>
